SECTION 1. IDENTIFICATION

Product Identifier: Road Guard™ Plus 8 Inhibited Calcium Chloride Brine
Other Means of Identification: Calcium chloride brine with corrosion inhibitors
Recommended Use: De-icing/anti-icing, Ice Melting, Dust control, Refrigeration, Road Base Stabilization, Full Depth Reclamation, Tire Weighting.
Restrictions on Use: Not Available
Initial Supplier Identifier: Green Touch Systems
1170 Eagan Industrial Road
Eagan, MN 55121
Emergency Telephone Number: CHEMTREC (800) 424-9300

SECTION 2. HAZARD IDENTIFICATION

Classification: Category 2: Serious eye damage/skin irritation
Label Elements: Color: Dark Brown, Physical state: Liquid, Odor: Odorless
Exclamation mark

GHS SIGNAL WORD: WARNING

Other Hazards
GHS HAZARD STATEMENTS:
GHS - Health Hazard Statement(s): Causes skin irritation/Causes serious eye irritation.

GHS - Precautionary Statement(s) - Prevention
Wear eye and face protection; Wear protective gloves; Wash thoroughly after handling.

GHS - Precautionary Statement(s) - Response
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do continue rinsing. If eye irritation persists: Get medical advice/attention.
IF ON SKIN: Wash with plenty of water, Take off contaminated clothing and wash it before reuse If skin irritation occurs: Get medical advice/attention.
Specific treatment (see First Aid information on product label and/or Section 4 of the SDS)

GHS - Precautionary Statement(s) – Storage: There are no Precautionary-Storage phrases assigned
GHS - Precautionary Statement(s) – Disposal: Dispose of contents and container in accordance with applicable local, regional, national, and/or international regulations.
Hazards Not Otherwise Classified (HNOC): None identified

SECTION 4. FIRST-AID MEASURES

Inhalation
Remove to fresh air if effects occur. Consult a physician.

Skin Contact
Wash off in flowing water or shower.

Eye Contact
Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Keep eye wide open while rinsing. If symptoms persist, call a physician.

Ingestion
Do not induce vomiting. Give large amounts of water or milk if available and transport to medical facility.

Most Important Symptoms and Effects, Acute and Delayed

Inhalation (Breathing): Inhaling mist, spray, or vapor may cause irritation to upper respiratory tract (nose and throat). Nasal mucosal and oropharyngeal erythema.

Skin: Skin Irritation. Skin exposure may cause slight irritation, redness, itching, swelling. May cause more severe response if skin is damp, abraded (scratched or cut), or covered by clothing, gloves, or footwear. Prolonged contact may cause more severe symptoms. Damage is localized to contact areas.

Eye: Eye Irritation. Eye exposure may cause serious eye irritation and pain. May cause conjunctival swelling and cornea opacification from hypertonic solution. Corneal eye pain, redness, acute corneal thickening or whitening.

Ingestion (Swallowing): Consumption of solids or hypertonic solutions causes nausea, vomiting, and increased thirst.

Delayed Symptoms/Effects: Chronic exposures to skin and mucus membranes that cause irritation may cause a chronic dermatitis or mucosal membrane problem

Immediate Medical Attention and Special Treatment
Notes to physician: Treat symptomatically

SECTION 5. FIRE-FIGHTING MEASURES

Extinguishing Media
Suitable
Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable
No information available.

Extinguishing Media
Specific Hazards
No information available.

Arising from the Product
Special Protective Equipment and Precautions for Fire-Fighters
Wear positive pressure self contained breathing apparatus (SCBA) and full protective fire fighting clothing (includes fire fighting helmet, coat, pants, boots, and gloves).

SECTION 6. ACCIDENTAL RELEASE MEASURES
Personal Precautions, Protective Equipment, and Emergency Procedures

Isolate area. Avoid contact with eye and skin. May be a slipping hazard. Stop leak if it can be done safely. Wash exposed body areas thoroughly after handling. Use appropriate safety equipment.

Methods for Containment and Cleaning Up

Prevent product from entering drains. See Section 12 for additional Ecological Information. Prevent further leakage or spillage if safe to do so. Dike far ahead of spill; use dry sand to contain the flow of material.

For small spills: contain spill if possible. Absorb with material such as sand. Collect material in suitable and properly labeled containers. Flush residue with plenty of water. For large spills: dike and transfer to suitable and properly labeled containers. Absorb with material such as sand. Flush residue with plenty of water.

SECTION 7. HANDLING AND STORAGE

Precautions for Safe Handling

Product shipped/handled hot can cause thermal burns. Selection of specific items such as gloves, boots, apron, or other, will depend on each operation. If hands are cut or scratched, use gloves impervious to this material for brief exposures. Use gloves with insulation for thermal protection, when needed.

Conditions for Safe Storage

Keep container tightly closed in a dry and well-ventilated place. Keep in properly labeled containers.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Regulatory Exposure Limit(s): Listed below for the product components that have regulatory occupational exposure limits (OEL’s).

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>ACGIH® TLV®</th>
<th>OSHA PEL</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>TWA</td>
<td>STEL</td>
</tr>
<tr>
<td>Particles Not Otherwise Regulated (PNOR) 00-00-001</td>
<td>15 mg/m³ (Total)</td>
<td>5 mg/m³ (Respirable)</td>
</tr>
</tbody>
</table>

The American Conference of Governmental Industrial Hygienists (ACGIH) is a voluntary organization of professional industrial hygiene personnel in government or educational institutions in the United States. The ACGIH develops and publishes recommended occupational exposure limits each year called Threshold Limit Values (TLVs) for hundreds of chemicals, physical agents, and biological exposure indices.

Notes

OEL: OCCUPATIONAL EXPOSURE LIMIT; OSHA: UNITED STATES OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION; PEL: PERMISSIBLE EXPOSURE LIMIT; TWA: TIME WEIGHTED AVERAGE; STEL: SHORT TERM EXPOSURE LIMIT

Appropriate Engineering Controls

When there is a potential for exposure, an emergency eyewash and safety shower should be provided within the immediate work area.

Individual Protection Measures

Eye/Face Protection

Wear safety glasses with non-flexible side shields or chemical goggles. A face shield should be worn if a potential for splashing or spraying exists.

Skin Protection

Wear appropriate protective non-leather protective gloves and boots. Wear appropriate protective, impervious clothing. Chemical protective gloves and boots such as PVC, Neoprene, or Heavy Nitrile are recommended. Leather products do not offer adequate protection and will dehydrate with resultant shrinkage and possible destruction.

Respiratory

A respirator is not indicated under normal operating conditions. Use of a NIOSH –

<tr>
<td>Conditions to Avoid</td>
<td>None known based on information supplied.</td>
</tr>
<tr>
<td>Incompatible Materials</td>
<td>Avoid contact with: bromide trifluoride, 2-furan percarboxylic acid because calcium chloride is incompatible with those substances. Contact with zinc forms flammable hydrogen gas, which can be explosive. Catalyzes exothermic polymerization of methyl vinyl ether. May release flammable hydrogen gas. Reaction of bromide impurity with oxidizing materials may generate trace levels of impurities such as bromates.</td>
</tr>
<tr>
<td>Hazardous Decomposition Products</td>
<td>Formed under fire conditions: hydrogen chloride gas, calcium oxide.</td>
</tr>
</tbody>
</table>
SECTION 11. TOXICOLOGICAL INFORMATION

Likely Routes of Exposure

**Product Information**

**Inhalation**
May cause irritation.

**Eye Contact**
Irritating to eyes.

**Skin Contact**
Slightly toxic by dermal absorption.

**Ingestion**
May cause irritation.

**Acute Toxicity**

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>LC50</td>
<td>LC50 greater than 100 mg/L in most sensitive species</td>
</tr>
<tr>
<td>LD50 (oral)</td>
<td>5678 mg/kg</td>
</tr>
<tr>
<td>LD50 (dermal)</td>
<td>7157 mg/kg</td>
</tr>
</tbody>
</table>

**Notes**

**Skin Corrosion / Irritation**
Brief contact is essentially non-irritating to skin. Prolonged contact may cause skin irritation, even a burn. May cause more severe response if skin is damp, abraded (scratched or cut), or covered by clothing, gloves, or footwear. Not classified as corrosive to the skin according to DOT guidelines.

**Serious Eye Damage / Irritation**
May cause serious eye irritation. May cause slight corneal injury. Effects may be slow to heal.

**STOT (Specific Target Organ Toxicity) - Single Exposure Aspiration Hazard**
No information available

**STOT (Specific Target Organ Toxicity) - Repeated Exposure Respiratory and/or Skin Sensitization**
No information available

**Carcinogenicity**
Not classified as a carcinogen per GHS criteria. This product is not classified as a carcinogen by NTP, IARC, or OSHA.

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>IARC</th>
<th>ACGIH®</th>
<th>OSHA</th>
</tr>
</thead>
</table>

**Reproductive Toxicity**

**Development of Offspring**
Not classified as a developmental or reproductive toxin per GHS criteria. For the major component(s): Did not cause birth defects or any other fetal effects in laboratory animals.

**Sexual Function and Fertility Effects on or via Lactation**
No information available

**Germ Cell Mutagenicity**
Not classified as a mutagen per GHS criteria. The data presented are for the following material: Calcium chloride (CaCl2) - In vitro genetic toxicity studies were negative. The data presented are for the following material: Potassium chloride - In vitro genetic toxicity studies were positive. However, the relevance of this to humans is unknown. For the minor component(s): Sodium chloride - In vitro genetic toxicity studies were predominantly negative.
SECTION 12. ECOLOGICAL INFORMATION (section heading must appear; all content is optional)

Ecotoxicity
Material is practically non-toxic to aquatic organisms on an acute basis. (LC50/EC50/EL50/LL50 >100 mg/L in the most sensitive species tested).

**Freshwater Fish Toxicity:**
- Calcium Chloride: LC50, bluegill (Lepomis macrochirus): 8,350 - 10,650 mg/l
- Potassium Chloride: LC50, rainbow trout (Oncorhynchus mykiss), 96 h: 4,236 mg/l
- Sodium Chloride: LC50, fathead minnow (Pimephales promelas): 10,610 mg/l

Persistence and Degradability
Calcium chloride is believed not to persist in the environment because it is readily dissociated into calcium and chloride ions in water. Calcium chloride released into the environment is thus likely to be distributed into water in the form of calcium and chloride ions. Calcium ions may remain in soil by binding to soil particulate or by forming stable salts with other ions. Chloride ions are mobile and eventually drain into surface water. Both ions originally exist in nature, and their concentrations in surface water will depend on various factors, such as geological parameters, weathering, and human activities.

Bio-accumulative Potential
Calcium chloride and its dissociated forms (calcium and chloride ions) are ubiquitous in the environment. Calcium and chloride ions can also be found as constituents in organisms. Considering its dissociation properties, calcium chloride is not expected to accumulate in living organisms.

Mobility in Soil
Calcium chloride is not expected to be absorbed in soil due to its dissociation properties and high water solubility. It is expected to dissociate into calcium and chloride free ions or it may form stable inorganic or organic salts with other counter ions, leading to different fates between calcium and chloride ions in soil and water components. Calcium ions may bind to soil particulate or may form stable inorganic salts with sulfate and carbonate ions. The chloride ion is mobile in soil and eventually drains into surface water because it is readily dissolved in water.

Other Adverse Effects
No information available

SECTION 13. DISPOSAL CONSIDERATIONS (section heading must appear; all content is optional)

Disposal Methods
Do not dump into any sewers, on the ground, or into any body of water. All disposal methods must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Tiger Calcium Services Inc. encourages that disposal methods be utilized in accordance with the above noted. For unused or contaminated product, the preferred options include sending the material to a licensed, permitted, reclaimer or waste water treatment system.

SECTION 14. TRANSPORT INFORMATION (section heading must appear; all content is optional)

Proper Shipping Name: Road Guard Plus (Calcium Chloride Brine)

Hazard Classification: Not regulated when shipped domestically by land.

TRANSPORTATION EMERGENCIES: CHEMTREC (800) 424-9300

### Special Precautions

Environmental Hazards: This product is not classified as corrosive to the skin according to DOT guidelines.

Transport in Bulk According to Annex II of MARPOL 73/78 and the IBC Code: Not Regulated

### SECTION 15. REGULATORY INFORMATION

**U.S. INVENTORY STATUS:**
- Toxic Substance Control Act (TSCA): All components are listed or exempt.
- TSCA 12(b): This product is not subject to export notification.
- Canadian Chemical Inventory: All components of this product are listed on either the DSL or the NDSL.

**CANADIAN REGULATIONS:**
- This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations.
- **WHMIS - Classifications of Substances:**
  - D2B – eye and skin irritant.

### SECTION 16. OTHER INFORMATION

**NFPA**

- Health Hazard: 1
- Flammability: 0
- Instability: 0

**HMIS**

- Health Hazard: 1
- Flammability: 0
- Physical Hazard: 0
